DETAILED ACTION

This is a response to the amendment filed 12/06/2004. Claims 1-10 are pending. Claims 1-4 are under examination. The non-elected claims 5-10 have been withdrawn from consideration.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, the recitation of "input n channel" in lines 9, 12, 15 and 19 lack proper antecedent basis.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 remain rejected under 35 U.S.C. 102(b) as being anticipated by Kaneyama (USP 4,985,703).

Figure 2 of Kaneyama shows a CMOS analog multiplexer circuit comprising multiple

Art Unit: 2816

series p channel MOS transistor input switches (Q104; Q109), multiple series p channel MOS transistor output switches (Q105; Q110), multiple pull down n channel MOS transistor switches (Q103, Q108), said circuit prevents cross signal feed through from unselected inputs shunting said feed through to circuit ground as called for in claims 1-2.

The limitations of claims 3 and 4 are seen to be inherently present in Kaneyama.

Response to Arguments

3. Applicant's arguments filed 12/6/2004 have been fully considered but they are not persuasive. Applicant argues that Kaneyama shows only n channel devices is not persuasive. column 3, lines 5-60 clearly indicate transistors Q104, Q105, Q109, Q110 of figure 2, Q205, Q206, Q211 and Q212 of figure 3 are p channel devices. Therefore, the limitations of claims 1-4 are fully met.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 2816

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
